

Wreck Dive

Cancun offers wreck diving that can be the most challenging as well as one of the your most rewarding dives. . **Our highly experienced guides will make this an exciting dive as well as a safe one.** Wrecks are colonized by Barracudas , giant groupers and different species of large fish; as well as the annual visit of eagle rays that migrate in the winter months. **It is an excellent deep dive characterized by strong current.**

The Wreck are the **C55 Barrera** and **C58 Anaya**. They are both navy minesweepers, and have been down for about 13 years. **Divers are able to dive inside and penetrate the wrecks.** The wreck dives are located at 85ft depth. **This dive is recommended for divers with some diving experience.**

Requirements:

- For certified divers only. (From any official certifying agency. Minimum level: open water diver ...minimun 3 dives).
- People with asthma, hypertension, heart or respiratory tract (ears, nose, lungs) problems cannot dive unless they bring medical authorization.
